ABOUT ME

Freelance Full Stack & AI Agent Developer with **2+ years** of hands-on experience building **modern, scalable web apps** and **AI-powered automation tools**. Passionate about creating **intuitive user interfaces** and integrating cutting-edge **AI technologies** like **OpenAI, n8n, and workflow automation**. From **video conferencing apps** to **GPT-powered assistants**, I bring ideas to life with **Next.js, React**, and a strong sense of product thinking. Committed to delivering **real-world impact** through clean code and polished UX.

EDUCATION

D.A.V. PUBLIC SCHOOL

2018-2020

Started self-learning web development, AI tools, and automation workflows alongside formal studies

S.S.V.M SCHOOL

2004-2018

Completed foundational education with a focus on discipline, mathematics, and early exposure to computers

SKILL

- JavaScript (ES6+)
- React.js, Next.js
- OpenAI APIs
- n8n Workflows
- AI Workflow Automation
- GPT Agents

WORK EXPERIENCE

AI Workflow Automation Tool

2025

A **smart ai assistant** that automated repetitive tasks like **email writing, scheduling, and content drafting**.

- Delivered **~40% time savings** for a client with high-volume content tasks
- Integrated directly into existing systems using **custom APIs**

Multi-user Video Call Application

2025

Designed and developed a full-featured **real-time communication** platform supporting **video calls, chats, and multimedia messaging**.

- Integrated **GetStream.io** to power real-time chat, media sharing (images, audio, video), and presence indicators
- Enabled **live video calls** using WebRTC, handling signaling and multi-peer connection logic
- Implemented authentication, user sessions, and media storage pipelines for efficient delivery

Biodata Generator Web App

2024

One-page tool to generate printable resume PDFs from form inputs.

- Built with JS, HTML, CSS3 — highly optimized and lightweight
- Fully responsive, clean UI, minimal load time

CERTIFICATIONS

- Zero to Hero: The Ultimate Front-End Web Dev Course**
